

uniK 08+

uniK 08+ features a totally new 8" kevlar low frequency driver and a custom engineered high frequency ribbon tweeter. The amplifier, filter section and crossover have been improved significantly and there are many exclusive and truly unique functions such as a character EQ, our innovative bass port plug, adjustable rubber feet that allows you to tilt the speaker and much more. You have to listen to them to believe!

uniK 05+

Based on the same design as the larger model, **uniK 05+** is simply one of the most powerful 5" monitor in its class

on the market today. This has been confirmed by a high number of excellent reviews by professional users and the press. If you have not listened to them yet, you should. You will not be disappointed.

aktiv 05

aktiv 05 boasts an ultra-flat low freq. response with a complete new silk dome tweeter design and the next generation of our famous 5" Kevlar driver, delivering unparalleled punch in the low-mid frequency. A new tuning of all components by our engineers in Germany and the use of the completely new crossover design, turn **aktiv 05** into yet another milestone in the ESI studio monitor legacy. In its price range, **aktiv 05** is certainly one of the most powerful products available today.

cosMik Lav

cosMik Lav, a pro omnidirectional lavalier microphone, is providing you a hands-free solution to capture natural and clear sound of interviews, dictations, lectures, speeches and much more that works with virtually all mobile audio and video recording apps. The special connector makes it

possible to connect your headset at the same time and is offering a quick and easy solution to playback and listen to your recordings without unplugging the microphone first. The included clip can be attached to your shirt or lapel and the foam pop shield softens the voice and shields from wind noise. **cosMik Lav** ships with a matching pouch for convenient storage and transport.

MAYA22 USB

MAYA22 USB is not simply another USB audio interface - it's a very stylish portable device that can go with you anywhere, offering total flexibility as a fully bus-powered USB device with excellent professional 24-bit audio quality. 2 analog input and 2 analog output channels with RCA connection, a microphone preamplifier with

XLR input and +48V phantom power, a Hi-Z instrument input for guitars, a high quality headphone output and TRS line outputs - making **MAYA22 USB** easily one of the most useful devices in your studio. All these features are provided with low latency **EWDM** drivers and **DirectWIRE** support, perfectly optimized for modern Windows versions and for Mac OS X supporting WDM, ASIO 2.0 and CoreAudio. It's incredible how many functions are provided by this small device!
